

**DO YOU ZONE OUT IN THE MIDDLE OF
YOUR VIDEO CALL?**

**ARE YOU SUPER PRODUCTIVE AND
PREFER TO MULTITASK BY
ATTENDING CALL AND DOING
SOMETHING ELSE?**

ENTERS...

MEET-MATE

Meet-Mate aims to solve this issue by providing a watch for you!

This extension alerts you whenever someone says your defined keyword.

It automatically generates notes, so there's nothing you have to worry about being the online meetings.

TECH STACK

- **Frontend - HTML**
- **Backend - JavaScript**

Available for Google Meet, as of now.

WORKING

This extension doesn't recognize speech rather the speech-to-text conversion is done by google meet itself. It uses captions to get the transcript of the meet. The background script observes the captions and saves in chrome storage. When you click the download button it takes all the transcript which has been saved till the moment in the storage, compiles it into pdf, and then serves you. Data automatically gets deleted when a new meeting is joined.

WORKING

To generate an alert the extension takes the auto-generated text of closed captions, traverses through the text and searches for the keyword mentioned by the user, and generates the beeping sound when that specific keyword is encountered.

AIM FOR THE NIGHT

To be of assistance to the **large student community** by creating this boon like much needed solution.

PRODUCTVE WEEKEND!
